Bank of Mum  
and Dad

## What is the bank of mum and dad?

---

Today it has been estimated that of loans made to help purchase a property in which the buyer will live, in over 50% of those loans, parents of the buyer will have contributed in some way to help make the purchase happen.

Those contributions are often called the “bank of mum and dad”.

It was not that long ago that the % was 15%.

The average contribution is said to be nearly \$90,000.

## How does the need for the bank of mum and dad arise?

---

The need for the bank of mum and dad arises normally because banks will not lend to first home buyers, even second and later home buyers, the level of finance that they require to buy the home that they want to buy, particularly in the Sydney market.

This happens because banks have loan to valuation ratios that they will not normally go beyond in making a loan.

So this means that relative to the market value of a property that is being purchased, banks will only lend up to a certain amount (called the loan to valuation ratio).
